

April 2013

Volume 73, Issue 4 - Pages A5–A12, 439–561

Message from the Editor

Big neuroscience (pages A5–A6)

Stephen L. Hauser and S. Claiborne Johnston

Nervecenter

What's next for Alzheimer treatment? While a β isn't out of the picture yet, several other therapeutic routes are being explored (pages A7–A9)

Andrew Schwartz

Computed tomography scans and cancer risk: Safety efforts: The radiology community has launched a number of initiatives to ensure safety and effectiveness in medical imaging (pages A9–A10)

Carrie Printz

Discoveries in Neuroscience

April 2013 (pages A11–A12)

Invited Editorial

Inflammatory cerebral amyloid angiopathy and amyloid-modifying therapies: Variations on the Same ARIA? (pages 439–441)

David J. Werring and Reisa Sperling

Neurological Progress

Nitric oxide signaling in the brain: A new target for inhaled nitric oxide? (pages 442–448)

Christiane Charriaut-Marlangue, Philippe Bonnin, Hoa Pham, Gauthier Loron, Pierre-Louis Leger, Pierre Gressens, Sylvain Renolleau and Olivier Baud

Original Articles

Anti-amyloid β autoantibodies in cerebral amyloid angiopathy-related inflammation: Implications for amyloid-modifying therapies (pages 449–458)

Fabrizio Piazza, Steven M. Greenberg, Mario Savoiaro, Margherita Gardinetti, Luisa Chiapparini, Irina Raicher, Ricardo Nitrini, Hideya Sakaguchi, Monica Brioschi, Giuseppe Billo, Antonio Colombo, Francesca Lanzani, Giuseppe Piscoquito, Maria Rita Carriero, Giorgio Giaccone, Fabrizio Tagliavini, Carlo Ferrarese and Jacopo C. DiFrancesco

G51D α -synuclein mutation causes a novel Parkinsonian-pyramidal syndrome (pages 459–471)

Suzanne Lesage, Mathieu Anheim, Franck Letournel, Luc Bousset, Aurélie Honoré, Nelly Rozas, Laura Pieri, Karine Masiona, Alexandra Dürr, Ronald Melki, Christophe Verny and Alexis Brice, for the French Parkinson's Disease Genetics Study Group

Brain injury biomarkers are not dependent on β -amyloid in normal elderly (pages 472–480)

David S. Knopman, Clifford R. Jack Jr, Heather J. Wiste, Stephen D. Weigand, Prashanthi Vemuri, Val J. Lowe, Kejal Kantarci, Jeffrey L. Gunter, Matthew L. Senjem, Michelle M. Mielke, Rosebud O. Roberts, Bradley F. Boeve and Ronald C. Petersen

***LTBP4* genotype predicts age of ambulatory loss in duchenne muscular dystrophy (pages 481–488)**

Kevin M. Flanigan, Ermelinda Ceco, Kay-Marie Lamar, Yuuki Kaminoh, Diane M. Dunn, Jerry R. Mendell, Wendy M. King, Alan Pestronk, Julaine M. Florence, Katherine D. Mathews, Richard S. Finkel, Kathryn J. Swoboda, Eduard Gappmaier, Michael T. Howard, John W. Day, Craig McDonald, Elizabeth M. McNally and Robert B. Weiss

Individual prediction of white matter injury following traumatic brain injury (pages 489–499)

Peter J. Hellyer, Robert Leech, Timothy E. Ham, Valerie Bonnelle and David J. Sharp

Welander distal myopathy is caused by a mutation in the RNA-binding protein TIA1 (pages 500–509)

Peter Hackman, Jaakko Sarparanta, Sara Lehtinen, Anna Vihola, Anni Evilä, Per Harald Jonson, Helena Luque, Juha Kere, Mark Screen, Patrick F. Chinnery, Gabrielle Åhlberg, Lars Edström and Bjarne Udd

Advanced imaging improves prediction of hemorrhage after stroke thrombolysis (pages 510–519)

Bruce C. V. Campbell, Søren Christensen, Mark W. Parsons, Leonid Churilov, Patricia M. Desmond, P. Alan Barber, Kenneth S. Butcher, Christopher R. Levi, Deidre A. De Silva, Maarten G. Lansberg, Michael Mlynash, Jean-Marc Olivot, Matus Straka, Roland Bammer, Gregory W. Albers, Geoffrey A. Donnan and Stephen M. Davis

Elevated temperature and 6- to 7-year outcome of neonatal encephalopathy (pages 520–528)

Abbot R. Lupton, Scott A. McDonald, Seetha Shankaran, Bonnie E. Stephens, Betty R. Vohr, Ronnie Guillet, Rosemary D. Higgins and Abhik Das, Extended Hypothermia Follow-up Subcommittee of the National Institute of Child Health and Human Development Neonatal Research Network

Cerebral amyloid angiopathy burden associated with leukoaraiosis: A positron emission tomography/magnetic resonance imaging study (pages 529–536)

M. Edip Gurol, Anand Viswanathan, Christopher Gidicsin, Trey Hedden, Sergi Martinez-Ramirez, Andrew Dumas, Anastasia Vashkevich, Alison M. Ayres, Eitan Auriel, Ellis van Etten, Alex Becker, Jeremy Carmasin, Kristin Schwab, Jonathan Rosand, Keith A. Johnson and Steven M. Greenberg

Whispering dysphonia (DYT4 dystonia) is caused by a mutation in the *TUBB4* gene (pages 537–545)

Katja Lohmann, Robert A. Wilcox, Susen Winkler, Alfredo Ramirez, Aleksandar Rakovic, Jin-Sung Park, Björn Arns, Thora Lohnau, Justus Groen, Meike Kasten, Norbert Brüggemann, Johann Hagenah, Alexander Schmidt, Frank J. Kaiser, Kishore R. Kumar, Katja Zschiegdrich, Daniel Alvarez-Fischer, Eckart Altenmüller, Andreas Ferbert, Anthony E. Lang, Alexander Münchau, Vladimir Kostic, Kristina Simonyan, Marc Agzarian, Laurie J. Ozelius, Antonius P. M. Langeveld, Carolyn M. Sue, Marina A. J. Tijssen and Christine Klein

Mutations in the autoregulatory domain of β -tubulin 4a cause hereditary dystonia (pages 546–553)

Joshua Hersheson, Niccolo E. Mencacci, Mary Davis, Nicola MacDonald, Daniah Trabzuni, Mina Ryten, Alan Pittman, Reema Paudel, Eleanna Kara, Katherine Fawcett, Vincent Plagnol, Kailash P. Bhatia, Alan J. Medlar, Horia C. Stanescu, John Hardy, Robert Kleta, Nicholas W. Wood and Henry Houlden

Brief Communications

Ceruloplasmin dysfunction and therapeutic potential for Parkinson disease (pages 554–559)

Scott Ayton, Peng Lei, James A. Duce, Bruce X. W. Wong, Amelia Sedjahtera, Paul A. Adlard, Ashley I. Bush and David I. Finkelstein

Letters to the Editor

Decreased incidence of childhood narcolepsy 2 years after the 2009 H1N1 winter flu pandemic (page 560)

Fang Han, Ling Lin, Jing Li, Xiao Song Dong and Emmanuel Mignot

Erratum

Erratum (page 561)

This article corrects:

Genome-wide meta-analysis identifies novel multiple sclerosis susceptibility loci[†]

Vol. 70, Issue 6, 897–912
