

ANNALS of Neurology

March 2013

Volume 73, Issue 3 - Pages A5–A9, 319–438

Message from the Editor

Multiple sclerosis: Monotherapy rules (pages A5–A6)

Stephen L. Hauser, S. Andrew Josephson and S. Claiborne Johnston

NerveCenter

Computed tomography scans and cancer risk: The latest findings : Two new studies add evidence to the risks associated with scanning (pages A7–A8)

Carrie Printz

Discoveries in Neuroscience

March 2013 (page A9)

Neurological Progress

On being a neurologist in industry (pages 319–326)

David Leppert and Robert Glanzman

Rapid Communication

Randomized study combining interferon and glatiramer acetate in multiple sclerosis (pages 327–340)

Fred D. Lublin, Stacey S. Cofield, Gary R. Cutter, Robin Conwit, Ponnada A. Narayana, Flavia Nelson, Amber R. Salter, Tarah Gustafson and Jerry S. Wolinsky, for the CombiRx Investigators

Original Articles

Diminished Th17 (not Th1) responses underlie multiple sclerosis disease abrogation after hematopoietic stem cell transplantation (pages 341–354)

Peter J. Darlington, Tarik Touil, Jean-Sebastien Doucet, Denis Gaucher, Joumana Zeidan, Dominique Gauchat, Rachel Corsini, Ho Jin Kim, Martin Duddy, Farzaneh Jalili, Nathalie Arbour, Hania Kebir, Jacqueline Chen, Douglas L. Arnold, Marjorie Bowman, Jack Antel, Alexandre Prat, Mark S. Freedman, Harold Atkins, Rafick Sekaly, Remi Cheynier and Amit Bar-Or, for the Canadian MS/BMT Study Group

Overinhibition of corticostriatal activity following prenatal cocaine exposure (pages 355–369)

Wengang Wang, Ioana Nitulescu, Justin S. Lewis, Julia C. Lemos, Ian J. Bamford, Natasza M. Posielski, Granville P. Storey, Paul E. M. Phillips and Nigel S. Bamford

Antibodies to contactin-1 in chronic inflammatory demyelinating polyneuropathy (pages 370–380)

Luis Querol, Gisela Nogales-Gadea, Ricard Rojas-Garcia, Eugenia Martinez-Hernandez, Jordi Diaz-Manera, Xavier Suárez-Calvet, Miquel Navas, Josefa Araque, Eduard Gallardo and Isabel Illa

Cerebral venous system and anatomical predisposition to high-altitude headache (pages 381–389)

Mark H. Wilson, Indran Davagnanam, Graeme Holland, Raj S. Dattani, Alexander Tamm, Shashivadan P. Hirani, Nicky Kolfschoten, Lisa Strycharczuk, Cathy Green, John S. Thornton, Alex Wright, Mark Edsell, Neil D. Kitchen, David J. Sharp, Timothy E. Ham, Andrew Murray, Cameron J. Holloway, Kieran Clarke, Mike P.W. Grocott, Hugh Montgomery and Chris Imray, Birmingham Medical Research

Validation of nigrostriatal positron emission tomography measures: Critical limits (pages 390–396)

Morvarid Karimi, LinLin Tian, Christopher A. Brown, Hubert P. Flores, Susan K. Loftin, Tom O. Videen, Stephen M. Moerlein and Joel S. Perlmutter

Autoantibodies to cytosolic 5'-nucleotidase 1A in inclusion body myositis (pages 397–407)

Helma Pluk, Bas J. A. van Hoeve, Sander H. J. van Dooren, Judith Stammen-Vogelzangs, Annemarie van der Heijden, Helenius J. Schelhaas, Marcel M. Verbeek, Umesh A. Badrising, Snjolaug Arnardottir, Karina Gheorghe, Ingrid E. Lundberg, Wilbert C. Boelens, Baziel G. van Engelen and Ger J. M. Pruijn

Cytosolic 5'-nucleotidase 1A autoimmunity in sporadic inclusion body myositis (pages 408–418)

H. Benjamin Larman, Mohammad Salajegheh, Remedios Nazareno, Theresa Lam, John Sauld, Hanno Steen, Sek Won Kong, Jack L. Pinkus, Anthony A. Amato, Stephen J. Elledge and Steven A. Greenberg

Thalamic involvement in patients with neurologic impairment due to Shiga toxin 2 (pages 419–429)

Sven G. Meuth, Kerstin Göbel, Tatyana Kanyshkova, Petra Ehling, Martin A. Ritter, Wolfram Schwindt, Martina Bielaszewska, Pia Lebiedz, Philippe Coulon, Alexander M. Herrmann, Wiebke Storck, Denise Kohmann, Johannes Müthing, Hermann Pavenstädt, Tanja Kuhlmann, Helge Karch, Georg Peters, Thomas Budde, Heinz Wiendl and Hans-Christian Pape

Brief Communications

No evidence of association between mutant alleles of the *CYP27B1* gene and multiple sclerosis (pages 430–432)

Maria Ban, Stacy Caillier, Inger-Lise Mero, Kjell-Morten Myhr, Elisabeth G. Celius, Jan Aarseth, Øivind Torkildsen, Hanne F. Harbo, Jorge Oksenberg, Stephen L. Hauser, Stephen Sawcer and Alastair Compston

No evidence for a role of rare *CYP27B1* functional variations in multiple sclerosis (pages 433–437)

Nadia Barizzzone, Ine Pauwels, Bernadetta Luciano, Dean Franckaert, Franca Rosa Guerini, Leentje Cosemans, Kelly Hilven, Alessandro Salviati, James Dooley, Dina Danso-Abeam, Alessia di Sapio, Paola Cavalla, Brigitte Decallonne, Chantal Mathieu, Adrian Liston, Maurizio Leone, Bénédicte Dubois, Sandra D'Alfonso and An Goris

Letter

**Good fats, bad fats, polyunsaturated fatty acids, and cognition in the elderly
(page 438)**

Stephen Cunnane
