

ANNALS of Neurology

December 2013

Volume 74, Issue 6

Pages A5–A12, 759–922

Message from the Editor

***Quo vadis?* – peering into the future (pages A5–A7)**

Stephen L. Hauser, S. Claiborne Johnston, Donna M. Ferriero, S. Andrew Josephson, Daniel H. Lowenstein, Robert O. Messing and Jorge R. Oksenberg

NerveCenter

Neuroscientists navigate divide on nonhuman primate research: New regulations concern some researchers, but others question the necessity of most research on nonhuman primates (pages A8–A9)

Andrew Schwartz

Neurologist with vision: Shirley Wray brings a unique viewpoint to the understanding of neuro-ophthalmology—and the field of neurology (pages A9–A10)

Discoveries in Neuroscience

December 2013 (pages A11–A12)

Editorials

Quantifying and addressing persistent stroke disparities in hispanics (pages 759–761)

Jose G. Romano and Ralph L. Sacco

Restoration: Potential for compensatory changes in numbers of neurons in adult human brain (pages 762–764)

Clifford B. Saper

Tissue hypoxia in autoimmune brain disease: A Columbian discovery? (pages 765–767)

Hartmut Wekerle

Point of View

Neuronal endoplasmic reticulum stress in axon injury and neurodegeneration (pages 768–777)

Shaohua Li, Liu Yang, Michael E. Selzer and Yang Hu

Original Articles

Persistent ischemic stroke disparities despite declining incidence in Mexican Americans (pages 778–785)

Lewis B. Morgenstern, Melinda A. Smith, Brisa N. Sánchez, Devin L. Brown, Darin B. Zahuranec, Nelda Garcia, Kevin A. Kerber, Lesli E. Skolarus, William J. Meurer, James F. Burke, Eric E. Adelman, Jonggyu Baek and Lynda D. Lisabeth

Greatly increased numbers of histamine cells in human narcolepsy with cataplexy (pages 786–793)

Joshi John, Thomas C. Thannickal, Ronald McGregor, Lalini Ramanathan, Hiroshi Ohtsu, Seiji Nishino, Noriaki Sakai, Akhiro Yamanaka, Carly Stone, Marcia Cornford and Jerome M. Siegel

Increase of histaminergic tuberomammillary neurons in narcolepsy (pages 794–804)

Philipp O. Valko, Yury V. Gavrilov, Mihoko Yamamoto, Hasini Reddy, Johannes Haybaeck, Emmanuel Mignot, Christian R. Baumann and Thomas E. Scammell

Mutations in gamma adducin are associated with inherited cerebral palsy (pages 805–814)

Michael C. Kruer, Tyler Jepperson, Sudeshna Dutta, Robert D. Steiner, Ellen Cottenie, Lynn Sanford, Mark Merkens, Barry S. Russman, Peter A. Blasco, Guang Fan, Jeffrey Pollock, Sarah Green, Randall L. Woltjer, Catherine Mooney, Doris Kretzschmar, Coro Paisán-Ruiz and Henry Houlden

Neurological deficits caused by tissue hypoxia in neuroinflammatory disease (pages 815–825)

Andrew L. Davies, Roshni A. Desai, Peter S. Bloomfield, Peter R. McIntosh, Katie J. Chapple, Christopher Linington, Richard Fairless, Ricarda Diem, Marianne Kasti, Michael P. Murphy and Kenneth J. Smith

Comparing positron emission tomography imaging and cerebrospinal fluid measurements of β -amyloid (pages 826–836)

Susan M. Landau, Ming Lu, Abhinay D. Joshi, Michael Pontecorvo, Mark A. Mintun, John Q. Trojanowski, Leslie M. Shaw and William J. Jagust, for the Alzheimer's Disease Neuroimaging Initiative

***TigarB* causes mitochondrial dysfunction and neuronal loss in PINK1 deficiency (pages 837–847)**

Laura J. Flinn, Marcus Keatinge, Sandrine Bretaud, Heather Mortiboys, Hideaki Matsui, Elena De Felice, Helen I. Woodroof, Lucy Brown, Aimee McTighe, Rosemarie Soellner, Claire E. Allen, Paul R. Heath, Marta Milo, Miratul M. K. Muqit, Andreas S. Reichert, Reinhard W. Köster, Philip W. Ingham and Oliver Bandmann

Iron and neurodegeneration in the multiple sclerosis brain (pages 848–861)

Simon Hametner, Isabella Wimmer, Lukas Haider, Sabine Pfeifenbring, Wolfgang Brück and Hans Lassmann

Splicing biomarkers of disease severity in myotonic dystrophy (pages 862–872)

Masayuki Nakamori, Krzysztof Sobczak, Araya Puwanant, Steve Welle, Katy Eichinger, Shree Pandya, Jeanne Dekdebrun, Chad R. Heatwole, Michael P. McDermott, Tian Chen, Melissa Cline, Rabi Tawil, Robert J. Osborne, Thurman M. Wheeler, Maurice S. Swanson, Richard T. Moxley III and Charles A. Thornton

***SLC25A22* is a novel gene for migrating partial seizures in infancy (pages 873–882)**

Annapurna Poduri, Erin L. Heinzen, Vida Chitsazzadeh, Francesco Massimo Lasorsa, P. Christina Elhosary, Christopher M. LaCoursiere, Emilie Martin, Christopher J. Yuskaitis, Robert Sean Hill, Kutay Deniz Atabay, Brenda Barry, Jennifer N. Partlow, Fahad A. Bashiri, Radwan M. Zeidan, Salah A. Elmalik, Mohammad M. U. Kabiraj, Sanjeev Kothare, Tommy Stödberg, Amy McTague, Manju A. Kurian, Ingrid E. Scheffer, A. James Barkovich, Ferdinando Palmieri, Mustafa A. Salih and Christopher A. Walsh

Preserved white matter integrity is a marker of familial longevity (pages 883–892)

Irmhild Altmann-Schneider, Anton J. M. de Craen, Ilya M. Veer, Annette A. van den Berg-Huysmans, P. Eline Slagboom, Rudi G. J. Westendorp, Mark A. van Buchem and Jeroen van der Grond, the Leiden Longevity Study Group

Ethoxyquin prevents chemotherapy-induced neurotoxicity via Hsp90 modulation (pages 893–904)

Jing Zhu, Weiran Chen, Ruifa Mi, Chunhua Zhou, Nicole Reed and Ahmet Höke

Predicting Alzheimer disease with β -amyloid imaging: Results from the Australian imaging, biomarkers, and lifestyle study of ageing (pages 905–913)

Christopher C. Rowe, Pierrick Bourgeat, Kathryn A. Ellis, Belinda Brown, Yen Ying Lim, Rachel Mulligan, Gareth Jones, Paul Maruff, Michael Woodward, Roger Price, Peter Robins, Henri Tochon-Danguy, Graeme O'Keefe, Kerryn E. Pike, Paul Yates, Cassandra Szoeki, Olivier Salvado, S. Lance Macaulay, Timothy O'Meara, Richard Head, Lynne Cobiac, Greg Savage, Ralph Martins, Colin L. Masters, David Ames and Victor L. Villemagne

Brief Communication

Polyglucosan body myopathy caused by defective ubiquitin ligase RBCK1 (pages 914–919)

Johanna Nilsson, Benedikt Schoser, Pascal Laforet, Ognian Kalev, Christopher Lindberg, Norma B. Romero, Marcela Dávila López, Hasan O. Akman, Karim Wahbi, Stephan Iglseider, Christian Eggers, Andrew G. Engel, Salvatore DiMauro and Anders Oldfors

Medical Hypothesis

Subconscious man: The basal ganglia as a target for intervention in emotional disorders (pages 920–922)

Yves Agid
